**This bulletin presents the 2017 quarter 1 (January to March) homelessness information for local authority districts in Kent. This data was collected through the P1E return and published by the Department of Communities and Local Government (DCLG).**

*See back of bulletin for homelessness notes and definitions.*

Between 1<sup>st</sup> January and 31<sup>st</sup> March, local authorities in the KCC area received 1,049 applications for housing assistance (this excludes households ineligible for assistance) under the homelessness legislation of the Housing Act 1996. This is 11% lower than the corresponding quarter last year when there were 1,180 applications.

Of the 1,049 decisions made during the quarter:  
39% (405) were accepted as 'homeless and in priority need' (known as 'owed a main homelessness duty')  
29% (306) were eligible but found not to be homeless.  
22% (229) were found to be eligible but not in priority need.  
6% (63) were eligible and in priority need but found to be intentionally homeless.  
4% (46) of the cases were suppressed as being <5 (see notes).

The 405 households accepted as homeless and in priority need is an increase of more than 26% (85 households) compared to one year ago. Where a household is accepted the authority must ensure that suitable accommodation and advice is available.

At the end of the March quarter, 1,031 households in Kent (KCC area) were living in temporary accommodation. This is 91 households more than the previous quarter and 212 households more than one year ago.

*Note: Figures in this document may not sum to totals because of rounding and suppression of <5 households in a category.*

## Homelessness summary: Key points from 2017 quarter 1 statistics

### Decisions taken on homeless applications (Table 1)

- During the quarter Local Authorities in Kent (KCC area) received 1,049 applications for housing assistance under the homelessness legislation of the Housing Act 1996 ('excluding ineligible households'). This is 131 (11%) less than the same quarter one year ago when 1,180 of the eligible household applications were 'accepted'. Since 2009 there has been a general upward trend in the number of decisions made not only in Kent but also in England. However recent quarters are showing a downward trend (Table 1).
- Canterbury was the highest district in Kent with 203 'accepted' decisions (of which 96 were eligible but not homeless) and, excluding London Boroughs, one of the highest local authorities in South East England (Table 1).
- Considering the historic trend the number of acceptances peaked in 2003/04 falling to a low in 2009/10. However, the current quarter, although higher than the last quarter is lower than the previous four quarters (Table 1, Chart 1a & b).

### Priority Need acceptances (Table 2) (main homelessness duty)

*Priority need households are those with dependent children or pregnant, elderly, a disability, mental illness, young person or suffering domestic violence*

- Within the KCC area 405 households of the 1,049 were accepted as homeless and in priority need. This is 85 more than quarter 1 one year ago. Where a local authority is satisfied that an applicant is eligible for assistance, is in priority need and is homeless through no fault of their own, the authority will owe a main homelessness duty. Such households are referred to as acceptances (Table 2).
- Acceptances vary across the county. During the current quarter both Thanet and Dover accepted 56 priority need households each, the highest districts in the county. In contrast Gravesham district recorded 8 priority need households. (Table 2, Chart 2a and b).
- To give an indication of relative levels of homelessness in relation to number of households, a comparison rate can be calculated. At the end of March 2017; nationally (England) had an estimated homelessness rate of 0.63 households in priority need per 1,000. In Kent eight local authorities were above the national average (ranging from 1.11 to 0.89); Medway Unitary recorded 0.61. The London Borough of Hackney was the highest nationally with an average 2.57 (ie 26 priority need households in every 10,000 households).

- Priority need acceptances for Kent (KCC area) do fluctuate from quarter to quarter. The four quarter moving average figure for the KCC area fell throughout 2013 then rose for nine consecutive quarters. The current quarter's increase of 66 should not be taken in isolation and needs to be balanced with the trend. However, nine districts show an increase compared to the previous quarter (Ashford, Canterbury, Dartford, Dover, Maidstone, Sevenoaks, Shepway, Swale and Tonbridge & Malling (Table 2, Chart 2a and b).

### **Households living in temporary accommodation (Tables 3 and 9)**

*If a settled housing solution is not immediately available accepted households may be placed in temporary accommodation.*

- At the 31<sup>st</sup> March 2017 there were 1,031 households in Kent (KCC area) living in all types of temporary accommodation. This is 212 households (26%) more than the same period one year ago when there were 819. Nationally, in the same period the number of households in temporary accommodation rose 8% to 77,240 (an increase of 5,700 households) (Table 3, Chart 3a and b).
- To give an indication of the relative numbers living in temporary accommodation, at the end of the 1<sup>st</sup> quarter 2017; the England average was 3.33 households per 1,000. All Kent districts were below the national average; ranging from 2.60 (Swale) to 0.70 households (Tonbridge & Malling). Medway Unitary Authority recorded 3.08 and the average for the London Boroughs was 15.12.
- At the local level Swale recorded the highest number of households (155) living in all types of temporary accommodation. However three other Kent local authorities recorded over 100 households. In contrast, Tonbridge & Malling district had 26 households in temporary accommodation (Table 3).
- Based on a 4 quarter moving average the number of households in all types of temporary accommodation is trending upward; annual increases have been recorded for ten consecutive quarters. This follows a relatively flat period throughout 2011-2014 (Chart 3a).
- Temporary accommodation includes a range of property. Households in all types of temporary accommodation at the end of the quarter are categorised as (Table 9).

| Kent (KCC) | England |  |
|------------|---------|--|
| 30%        | 8%      | in Bed and Breakfast accommodation           |
| 5%         | 7%      | in Hostels                                   |
| 24%        | 19%     | in LA or Social Landlord (HA/RSL) dwellings  |
| 6%         | 32%     | in leased private sector dwellings           |
| 35%        | 34%     | in other accommodation (eg private landlord) |

### **Bed and Breakfast accommodation (Table 4)**

*Bed and breakfast hotels represent the least suitable form of temporary accommodation for most households, particularly those with families, and should be used only as a last resort. Preferably for up to six weeks while applications are processed.*

- In Kent (KCC area) 294 households were in bed and breakfast accommodation at the end of March, 39% more than one year ago when there were 212 households (Table 4).
- At local authority level Swale district had the highest number of households in bed and breakfast accommodation with 67. In contrast three districts (Dartford, Gravesham and Sevenoaks) recorded none or less than 5 households (<5, see definitions) (Table 4).
- The DCLG publishes numbers of families with children that are in bed and breakfast accommodation for more than 6 weeks (excluding those pending a review by the local authority). In the current quarter there are 1,019 families recorded in England, down from 1,126 in the previous quarter. In Kent & Medway there are 45 families in this category (KCC area 38 & Medway UA 7); up from 22 at the end of the previous quarter. Nationally the London Boroughs of Redbridge, Southwark and Reading UA have the most families in this group with 142, 176 and 67 respectively.

### **'Other types' of temporary accommodation (Table 8)**

*This type of accommodation includes short term leases in the private sector when no (or unsuitable) official accommodation is available and could be considered to be one of the early indicators of underlying problems.*

- The number of households in 'other types' of temporary accommodation has now passed the previous peak of early 2012. Numbers subsequently fell to a low in early 2013, but since then have been on a rising trend and are still increasing (Table 8 & chart 8).
- At the end of the current quarter 338 households in Kent were recorded as being in this type of accommodation; the highest figure in recent years and the eighth consecutive quarterly increase. It represents 40 more households than the previous quarter and 175 households more when compared to one year ago (163 households) (Table 8).
- Nationally 26,020 households (+8% in a year) are in this type of accommodation with Medway Unitary recording 283 households (+67% in a year) (Table 8 & chart 8).

## National level characteristics (local level information is not available)

- The main reason for the loss of a household's last settled home during the quarter was:  
The end of an Assured Shorthold Tenancy (29%) (ie a tenancy with a private landlord), one of the highest recorded. (AST is an increasingly common cause of loss of last home over the last six years, rising from a low Q4 2009 (11%) to Q1 2017 (29%). This indicates that affordability is an increasing issue, as more households facing the end of a private tenancy are unable to find an alternative home without assistance. The increase in the end of tenancies is also related to the expansion of the private rented sector, which has doubled in size (since 2002).  
The second reason given is that parents or friends are no longer able or willing to provide accommodation (26%). Other reasons cited were; a relationship breakdown (violent or other reasons), which taken together were responsible for 17% of acceptances. Financial problems such as mortgage arrears (1%) and rent arrears (3%) are currently not a significant factor and together account for 520 households nationwide.
- Nationally, during the quarter 'priority need' households (14,600) were:  
Those with dependent children 67% (52% in 2005)  
Where a household member is pregnant 7% (12% in 2009).  
With a mental illness 10%.  
A physical disability 8%.  
In addition a further five categories covering the remaining 8% (including young persons 2%).
- Nationally 2,540 foreign national applicants were accepted as homeless between 1<sup>st</sup> January and 31<sup>st</sup> March 2017 down 5% compared to one year ago (2,670). Of these, 520 were European Economic Area (EEA) accession country (A10) nationals, 640 were from other EEA countries and 1,370 were from outside the EEA. During this quarter foreign nationals accounted for 17% of all acceptances.

### Use of the Data

This bulletin is one of a series on different topics. The data are used for a variety of purposes; generally as evidence and intelligence to monitor and support Kent County Councils (KCC) business performance. The information is also used to support KCC projects and initiatives such as in the formulation of policy, monitoring resources, answering questions, queries and benchmarking against other authorities.

The various bulletins are used by and distributed to Kent Local Authority planning policy teams, KCC population forecasting, KCC district profiles dashboard, KCC Education department, KCC Locate in Kent, the Kent Housing Group (KHG) and the Kent Developers Group (KDG). See also: <http://www.nationalarchives.gov.uk/doc/open-government-licence/version/3/>

Households are DCLG 2014-based household projections, projected to 2016.

As included in the DCLG homelessness quarterly release

## Background notes for homelessness data

The Local Authority where you live will provide help and advice to keep you in your home. In addition they also have a legal duty under the Housing Act 1996 to assist you if you have nowhere to live. The level of assistance depends upon your status but they will always provide you with advice and assistance.

The full duty is only for those who are:

- Eligible for assistance in accordance with section 185 of the Housing Act 1996
- Homeless in accordance with section 175 of the Housing Act 1996.
- Priority Need (e.g. a family with children, pregnant, vulnerable due to old age, disabilities, mental health, care leavers, domestic violence) Section 189 of the Housing Act 1996
- Intentionality – whether or not someone has done or failed to do something which was a deliberate act the consequence of which led to the loss of their home, in accordance with section 191 of the Housing Act 1996.
- Local Connection under Section 193 of the Housing Act 1996

If you are homeless or threatened with homelessness contact the Housing team in the Local Authority where you live who will advise you about homelessness assessments. A Homelessness Assessment involves a detailed interview to look at your circumstances and to apply the legal criteria to check if they have a legal duty to help you.

Additional comprehensive information can be obtained from the DCLG homelessness publications related links website: [DCLG statistics, definitions and legislation](#)

### The Localism Act 2011

The Localism Act 2011 allows authorities to place homeless households into private rented sector and places a re-application duty on them if a household becomes unintentionally homeless again within two years. The DCLG has collected quarterly figures from local authorities on the operation of this new duty from 2013.

### About the P1E monitoring return

Key information about local authorities' discharge of their duties under homelessness legislation is collected on quarterly P1E returns. All returns undergo thorough validation to ensure that data are as complete and accurate as possible, with a minimum target that 90 per cent of local authorities respond. Estimates are made for missing returns, along with imputations for any incomplete data; this is currently not happening to Kent authorities. Summary results are published in a quarterly Statistical Release by Communities and Local Government/National Statistics, in accordance with National Statistics Code of Practice.

### **Definition of homelessness**

The term "Homelessness" is often considered to apply only to people "sleeping rough". However, most of the statistics on homelessness relate to the statutorily homeless i.e. those households which meet specific criteria of priority need set out in legislation, and to whom a homelessness duty has been accepted by a local authority.

Such households are rarely homeless in the literal sense of being without a roof over their heads, but are more likely to be threatened with the loss of, or are unable to continue with, their current accommodation.

### **Definition of rough sleepers**

Rough Sleepers are defined as people who sleep in the open air (such as on the streets, or in doorways, parks or bus shelters) or in buildings or other places not designed for habitation (such as barns, sheds, car parks, cars, derelict boats, stations, or "bashes" – shelters made from cardboard boxes). For information on "rough sleepers in England" the Department of Communities and Local Government has collected annual data on rough sleepers since 1998, and publish experimental information and statistics.

### **Statutory homelessness**

Each local housing authority is required to consider housing needs within its area, including the needs of homeless households, to whom local authorities have a statutory duty to provide assistance.

Housing Acts of 1977, 1985 and 1996, and the Homelessness Act 2002, placed statutory duties on local housing authorities to ensure that advice and assistance to households who are homeless or threatened with homelessness is available free of charge. A "main homelessness duty" is owed where the authority is satisfied that the applicant is eligible for assistance, unintentionally homeless and falls within a specified priority need group. Such statutorily homeless households are referred to as "Acceptances".

### **Households in priority need**

The priority need groups include households with dependent children or a pregnant woman and people who are vulnerable in some way e.g. because of mental illness or physical disability. In 2002 an Order made under the 1996 Act extended the priority need categories to include: applicants aged 16 or 17; applicants aged 18 to 20 who were previously in care; applicants vulnerable as a result of time spent in care, in custody, or in HM Forces, and applicants vulnerable as a result of having to flee their home because of violence or the threat of violence.

Where a main duty is owed, the authority must ensure that suitable accommodation is available for the applicant and his or her household. The duty continues until a settled housing solution becomes available for them, or some other circumstance brings the duty to an end. Where households are found to be intentionally homeless, or not in priority need, the authority must make an assessment of their housing needs and provide advice and assistance to help them find accommodation for themselves.

---

### **Households "homeless at home"**

Are those accepted as owed a main duty, or awaiting a decision on their application, but able to remain in their existing accommodation for the immediate future.

### **Temporary accommodation**

Households in accommodation arranged by local authorities pending enquiries or after being accepted as homeless awaiting re-housing. This can include bed and breakfast hotels, self-contained annexe style units, hostels/women's refuges, Local Authority and Registered Social Landlord stock and leased private sector stock.

### **Decisions**

Refer to decisions taken in respect of all eligible households that apply for assistance under the Housing and Homelessness Acts. These do not therefore include households found to be ineligible for assistance (some persons from abroad are ineligible for assistance).

### **Acceptances**

A main 'homelessness duty' is owed where the authority is satisfied that the applicant is eligible for assistance, unintentionally homeless and falls within a specified priority need group. Such statutorily homeless households are referred to as 'acceptances'. These households are consequently owed a main homelessness duty by a local housing authority which continues until a settled housing solution becomes available or circumstances bring the duty to an end.

### **Self-contained and shared accommodation (ie bed and breakfast)**

This includes all temporary accommodation where the household has sole use of kitchen and bathroom facilities, including property held by local housing authorities, registered social landlords and private sector landlords. A distinction is made between this type of accommodation and accommodation where such facilities are shared with other households (i.e. bed and breakfast, hostels and women's refuges).

### **A10 nationals**

The 10 accession countries (A10) are made up from the 8 accession countries that joined the EU on 1st May 2004 (Czech Republic, Estonia, Latvia, Lithuania, Slovenia, Slovakia, Poland and Hungary) and the 2 accession countries that joined the EU on 1st January 2007, Bulgaria and Romania. Croatia joined the EU on 1st July 2013 and became an accession country, data first collected in 2014 Q2.
